

II. SPECIFICATION AMENDMENTS

Please amend the Abstract on Page 15 as follows:

ABSTRACT

This invention relates to a high production rate machine for personalization (2) of integrated circuit modules (51₀,...51_n) fitted on a film ribbon (5) ~~comprising~~ including a rotating personalization wheel with which the film ribbon is forced into contacts ~~7~~. ~~means of setting up~~ Communication is set up with the integrated circuit, at least on a portion of the rotating personalization wheel (1), and ~~means (61, 62, 63, 64, 65) of positioning and driving~~ the film ribbon is synchronously positioned and driven with rotation of the personalization wheel (1).
